THE DUECE OF DARWINISM.
[From the N. Y. Mercury.]
The fault with science, of the Darwin or any other sort, is that it causes its followers to go and make fools of themselves. They take in and believe everything that is told them. If some angel astronomer informs them that the moon is made of green cheese, and that the sun follows it about the heavens with the ultimate intention of toasting it, they get it down under the heading, "Later Scientific Discoveries." And under that heading may be recorded the story of
SCIENCE AND THE BABY.
It was at an advanced age that Adolphus Crimonsore, who was naturally absent minded, remembered that it was his duty to get married, and doing so, was rewarded by a baby. Though it was his own flesh and blood, Mr. Crimonsore was determined to make the agent of an experiment to be performed in the interests of science. Therefore, when the nurse brought it to him, as he sat in his library, he quietly and unobserved deposited it in the coal-scuttle and handed the woman another bundle, which she bore, he following, to the sick-room.
He held in his hand a favorite book, open at a certain page, and watched the working of his experiment with the calmness and compeency of a truly scientific mind. Mrs. Crimonsore and a few ladies were present.
The Doctor took the bundle in his arms and kissed its little face. "I congratulate you, Mr. Crimonsore."
A shrewd and anguished expression crept over the countenance of the philosopher, as he said:
"As an enlightened scientist and an experienced M. D., do you pronounce it to be a proper and creditable specimen of a human infant?"
"I certainly do," answered the learned Dr.
"And you, Mrs. D., who, in your capacity of nurse, have attended to the early wants of one hundred and two—"
"One hundred and fifty-two," interrupted the lady.
"One hundred and fifty-two infants—what is your opinion?"
"Ah!" cried Mrs. D.—"the loveliest baby that ever the sun shone on; and looks just like its pa!"
For a single instant Mr. Crimonsore seemed disconcerted. "Looks like me, does it?" he exclaimed, and involuntarily glanced at himself in the mirror.
"Unh! Ah! Does it, indeed? Well! Well—what does it signify? A confirmation only of the truth of the Great Man's opinions. Allow me to read you from this work, Dr. B., which is Charles Darwin's—(M. A. F. R. S., etc.) 'Descent of Man,' Vol. I, page 198. 'The early progenitors of man were no doubt covered with hair, both sexes having beards; their ears were pointed and capable of movement; and their bodies were provided with a tail having the proper muscles.'"
"What has that got to do with our baby?" cried the mother.
The philosopher paid no heed to her, but turning to page 14 of the work, read:
"It is," said Dr. Huxley, "quite in the later stages of development that the young human being presents marked differences from the young ape."
"The professor," said Crimonsore, closing the book, "speaks of the young human before it is born, but I think that I have proved that capable and experienced personages may fall to discriminate between the young human being and the young ape even after it is born."

ADMINISTRATIVE SALE.
—OF—
REAL ESTATE.
By virtue of a decree of the Chancery Court of Tallahatchie county, Miss., made at the January term, 1873, the undersigned, administrator of the estate of Robt. L. Andrews, dec'd., will, on Monday, the 24th day of February, between the hours prescribed by law at the door of the courthouse in the County of Tallahatchie, in said State, sell to the highest bidder for one-half cash and one-half on a credit of 12 months, the following lands belonging to said estate, lying and being in the County of Tallahatchie, near the town of Batesville, to-wit: the northern quarter of section 26 in township 1, range 1 west, containing 160 acres, more or less. The lower of the undersigned in said land will be sold and relinquished to the purchaser thereof at the same time and place.

THE UNITED STATES ARMY.
Its Present Strength and Location of the Troops.
The work of recruiting for the army is steadily going on, recruiting offices being located in all the important cities of the country, and thus the army will be kept up to its full standard of 200,000 men, the number authorized by the late law of Congress. The number of commissioned officers now on the rolls of the War Department is something over 21,000, the reduction having been entirely completed. The army now consists of five batteries of artillery, ten regiments of cavalry, twenty-five regiments of infantry, and a battalion of engineers. These troops are stationed as follows: The engineer battalion at Willard's Point and West Point, New York; the 1st artillery in Virginia, South Carolina and Florida; 2d in North Carolina and Virginia; 3d in New York; 4th in Wyoming and Virginia; 5th in New York and New England States. The 1st cavalry is in Arizona; 2d in Montana and Wyoming; 3d in Nebraska and Wyoming; 4th in Texas; 5th in Arizona; 6th in Kansas and California; 7th, Tennessee Kentucky and Mississippi; 8th in New Mexico; 9th in Texas; and 10th in the Indian Territory. The 1st regiment of infantry is in New York and Michigan; 2d in Florida, Alabama and Tennessee; 3d in Kansas, Colorado and Indian Territory; 4th in Kentucky; 5th in Kansas; 6th in Dakota; 7th in New Mexico; 8th in New York and Wyoming; 9th and 10th in Wyoming and Nebraska; 11th and 12th in Texas; 13th and 14th in Wyoming and Montana; 15th in New Mexico; 16th in Tennessee and Kentucky; 17th in Dakota Territory; 18th in South Carolina; 19th in Louisiana and Arkansas; 20th in Dakota and Minnesota; 21st in Washington Territory and Oregon; 22d in Dakota; 23d in Arizona; 24th in Texas; 25th in Texas and Indian Territory. But few recruits are being sent to the west now, and none to the northwest, as the Missouri river is closed by ice. The regiments in the Southern States are being changed from one locality to another in some few instances, and when spring opens it is quite likely that the troops in the Western States and Territories will be relieved. The army now is in an excellent condition, and in recruiting great care is taken to secure the healthiest men.
A bill has passed both Houses of Congress abolishing the franking privilege. The President will approve it. It is a good law, and ought to have been passed years ago. The members of Congress have become too corrupt to have this privilege, as they have abused it shamefully.
Col. J. L. Power and Capt. H. T. Fisher have been appointed by Gov. Powers agents for the State of Mississippi, in preparing and receiving articles for exhibition at the Vienna (Austria) International exposition.
The Courthouse at Hattiesburg, Miss., DeSoto county \$21,354 00, when completed.
